### W M SYMPOSIUM 2004

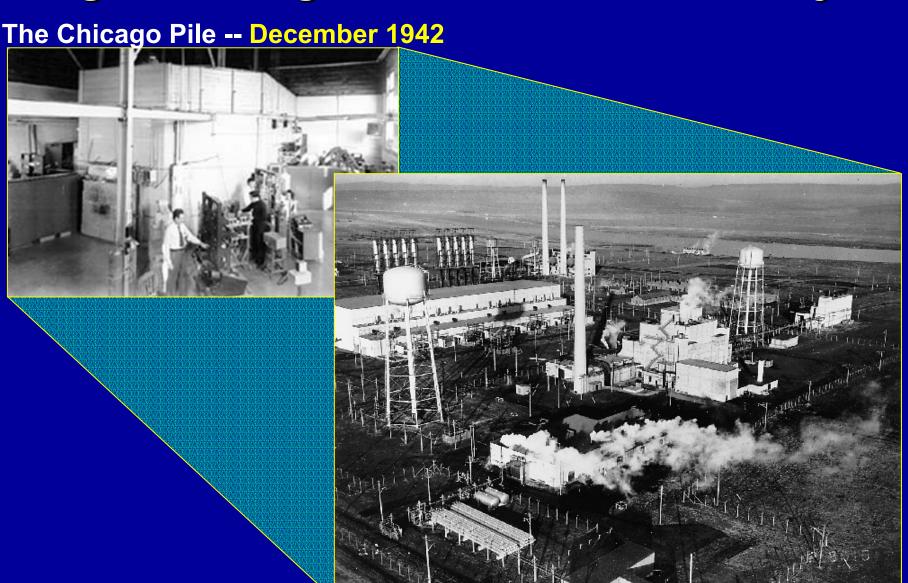

### Mike Hughes

President and General Manager Bechtel Jacobs Company LLC Oak Ridge, Tennessee

# Completion of the EM Accelerated Cleanup Scope depends on the ability to take our recent successes and move to FULL PRODUCTION NOW!

A Sense of Urgency --- Without Panic!

#### Huge Challenges on First-of-a-Kind Projects

**Hanford B-Reactor Complex -- September 1944** 

#### The Challenge:

Total "To-Go" Scope AND Risk of Individual Subprojects

Environmental Management Top-to-Bottom Review: Implementation Status

#### Table 1. EM's Short-Term Performance Goals

Performance Measure	Unit	Targets			Completed to Date	Life-
		FY03	FY04	FY05	(Pre-2003 Actuals)	Cycle Scope
Pu packaged for long-term disposition	containers	2,836	1,323	165	1,484	5,850
eU packaged for disposition	containers	277	925	669	1,853	9,101
Pu/U residues packaged for disposition	kg bulk	934	254	76	106,519	107,782
DU & U packaged for disposition	MT	1,815			3,100	742,1,9
Liquid waste eliminated	k-gallons	700	1.300	1,900		88,000

# Liquid Waste Tanks Completed to Date To Go 2 241

# D&D of Facilities Completed to Date To Go 3,750

## Size of Facilities Represents a Challenge in Waste Handling, Packaging, Transport, and Disposal

Hanford
233-S Plutonium
Facility
(3500 sq. ft.)

**T-Plant** 

**REDOX** 

**U-Plant** (62,000 sq. ft.)

PUREX

(99,000 sq. ft.)

**B-Plant** 

**PFP** 

Oak Ridge Facility D&D 1301 1405

(9800 sq. ft.) (4700 sq. ft.) **K-25** (1,640,000 sq. ft.)

**K-27** (374,000 sq. ft.)

#### Oak Ridge

**Building 1301 at East Tennessee Technology Park (ETTP)** 

**Building K-25 at ETTP** 

## **Project Management Challenges Are Not Unique to Our Industry**

- Clearly defined scope
- Solid cost estimate, schedule, and baseline
- Well-documented execution strategy
- Resources matched to the plan
- Agreement between contractor and owner on final product
- Doing work safely and in regulatory compliance
- Delivering value

Both DOE and Contractors have taken positive steps to accelerate cleanup

#### Defining the Challenge

#### A REVIEW OF THE ENVIRONMENTAL MANAGEMENT PROGRAM

UNITED STATES DEPARTMENT OF ENERGY

PRESENTED TO THE

ASSISTANT SECRETARY FOR ENVIRONMENTAL MANAGEMENT

by the

TOP-TO-BOTTOM REVIEW TEAM

- Focus on major risk reduction
- Change the way we do business
- Reduce internal processes
- Employ D&D for footprint reduction
- Eliminate non-cleanup activities
- Obtain Congressional EM funding support

February 4, 2002

#### **Stepping Up to the Challenge**

- Completing work that eliminates highest risks first
- Focusing resources on most challenging work
- Streamlining contracts by eliminating non-value added requirements
- Applying best commercial practices

#### Stepping Up to the Challenge

- Responding competitively to DOE's new contracting approach
- Accepting more cost and schedule risk for higher potential reward
- Reducing number of total injuries across entire complex
- Implementing Integrated Safety Management

# Contractor Feedback What would you do today if you were a senior DOE decision maker?

#### **Actual Contractor Feedback**

- Assess and validate that DOE field offices are implementing the philosophy to manage the contract and not the contractor
- Improve the department's relationship with regulators, the states, and stakeholders to work together to effect positive change
- Cut additional red tape in DOE regulations and reassign or weed out personnel who are perpetuating outdated work processes, procedures, and regulations

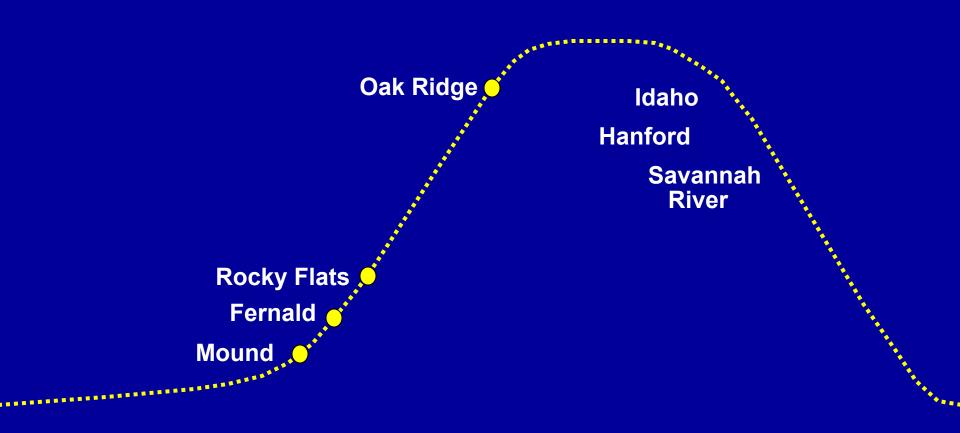

#### **Actual Contractor Feedback**

- Call for more consistency at the various sites on common procedures, processes, and policy so it doesn't have to be reinterpreted
- Improve the process to deliver funding as promised and on time
- Work together (contractors, DOE, and regulators) to develop risk-based end states that are technically defensible and reduce cost and schedule

We share a common goal – to accelerate and complete the cleanup!

#### Accelerated Cleanup -- The Path Ahead to Full Production

## Ramping Up Requires Deliberate and Bold Actions

- Leverage our successes and build on the momentum
- Think and act commercially
- Accelerate starts on multiple fronts ... now!
- Keep waste 'pipelines' open
- Work with regulators and stakeholders to clearly define end states
- Work injury free
- Recognize success and celebrate completions

# MISSISA: ACCOMPLISA:
