

Working Together for Nuclear Reality

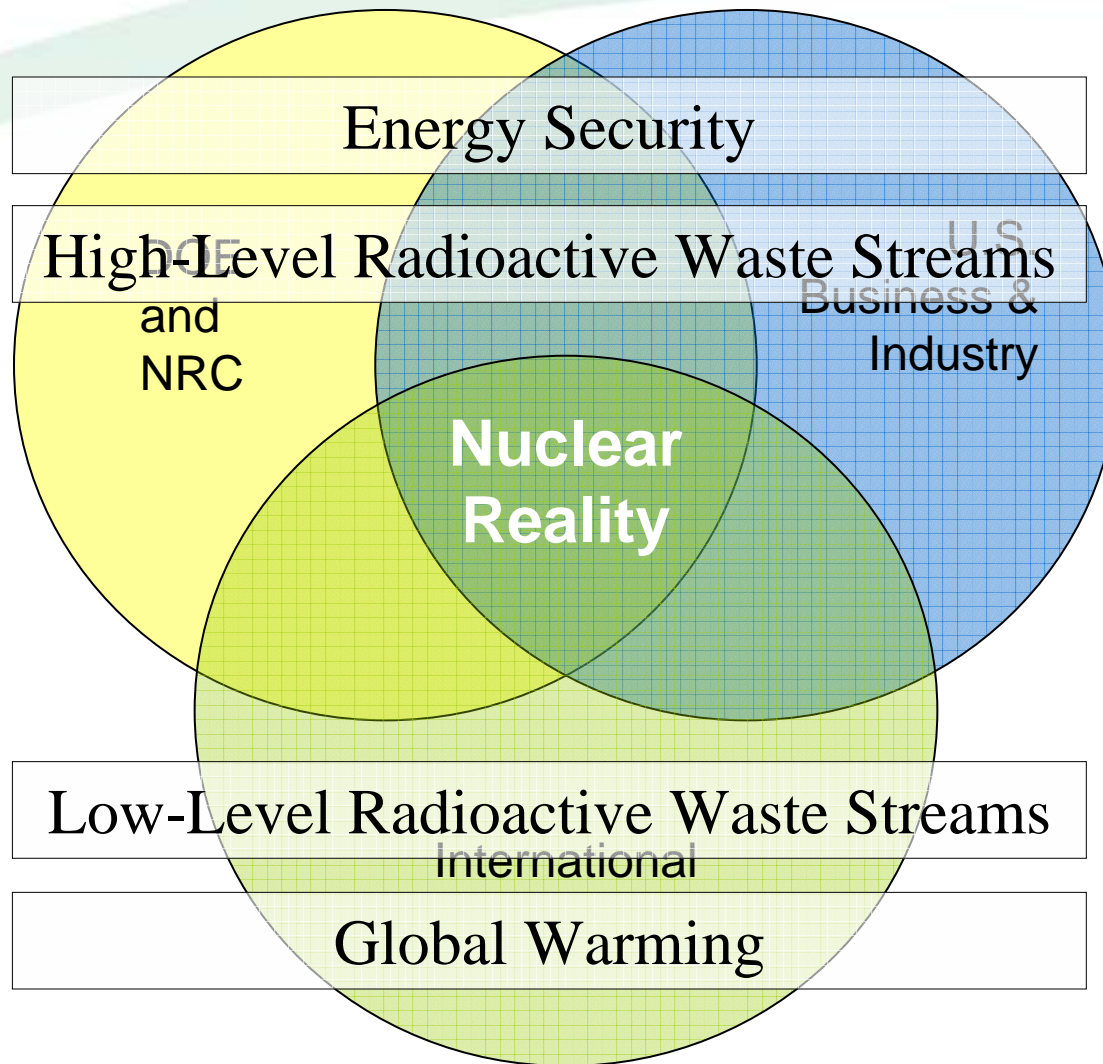

Steve Creamer
Chairman and CEO
Energy Solutions

Players and Issues

Players and Issues

Challenges and Opportunities

- Energy Security
 - \$100 barrel of Oil
- Global Warming
 - #1 World-Wide Environmental Issue
- Spent Fuel
 - Reprocessing
 - Repository

Challenges and Opportunities Cont.

- Power Plants, Facilities & Sites
 - Realize a Positive Legacy
- Education
 - Acceptance of New Build
 - New Workforce for our Industry

Legacy

- Safety
 - Continue to focus on Safety
 - Highlight our Safety accomplishments
- Realize a Positive Nuclear Legacy
 - Turn it around
- Keep Promises
 - Budgets
 - Schedules
 - Publicize Progress
- Accountability
 - Contractors
 - DOE

International

"I said that this would be the year when we made the right long-term decisions for the future of the country and one of these decisions is that we have safe, secure energy."

*Gordon Brown,
UK Prime Minister*

Press Reaction

theguardian

Britain needs secure and low-carbon energy, which left the government little choice yesterday other than to opt for nuclear. It was right to do so.

METRO

Safety doubts won't go away

The Daily Telegraph

The market will be better placed to deliver our nuclear future than the man in Whitehall.

Despite the qualms of environmental groups, Britain's nuclear power stations have been producing energy reliably, safely and cleanly for more than half a century.

THE TIMES

After a decade of prevarication, the Government's announcement on nuclear energy is very welcome.

Nuclear may have a murky past, but it has a bright future.

It seems likely that citizens ... are becoming more pragmatic about the nuclear issue.

The case for nuclear is attractive.

Nuclear's backers need to display stronger conviction.

Road Map to Nuclear Reality
