Nuclear Engineering International is now in its 50th year of publication. Having been published since the very birth of commercial nuclear power in 1956, NEI has a unique position within the industry and an enviable reputation for providing independent, technical and business analysis for the nuclear power industry. Renowned for reliable and quality editorial reports, it's a must for anyone working in this dynamic industry. NEI is sent to a carefully targeted audience of utility executives and managers, private project owners, power plant managers, engineering and environmental consultants, financial experts and investment companies, independent power producers, government energy bodies, mechanical and electrical engineers and equipment manufacturers and suppliers. NEI has over 1000 independent paying subscribers - a clear indicator that NEI is the magazine that professionals in the nuclear power industry turn to first for the information they need.

Radwaste Solutions is the only magazine serving the nuclear waste management and cleanup business segments of the industry. In the United States, this business is centered on four industry subsets: (1) the Department of Energy's remediation of its weapons production and research facilities; (2) the DOE's civilian

WM2009 EXHIBITORS

radioactive waste activities; (3) nuclear utilities, and (4) nonpower, non-DOE activities.

Also, other countries are cleaning up and decommissioning their government nuclear facilities and older nuclear power plants, and U.S.

businesses are increasingly obtaining contracts and subcontracts to perform this work. NOTE: A complimentary copy of the current issue is included in your WM2009 registration packet!

Use Griffolyn ® Reinforced polyethylene laminates specifically for custom storage/shipping covers, bags and containment. Griffolyn is patented, high-strength reinforced grid provides superior puncture and tear resistance. Customizable to any size and shape, Griffolyn is a cost effective and durable solution to prolong the service life of your investments.

River Bend Transfer Systems, LLC

Contact: Geoffrey Barnes
Booth #: 439

1933 Jadwin Avenue, Suite 200
Richland, WA 99354 USA
P: 509-943-4673 F: 509-943-0249
Email: gabarnes@riverbendtransfer.com
Website: www.riverbendtransfer.com

River Bend Transfer Systems provides custom designed systems utilizing hose-in-hose technology for conveying chemicals and other hazardous materials. State and federal regulatory agencies insist on safe and dependable handling of chemicals and chemical waste. Our cost effective and efficient alternative to double wall containment pipe exceeds the demands of the chemical and waste management industries. Working with contractors for the US DOE Hanford Site, River Bend has built a number of hose-in-hose transfer line (HIHTL) systems that are used to transfer high level nuclear waste throughout the Hanford site. Hanford now utilizes them for all temporary nuclear waste transfers. To date, over 15 million gallons of radioactive waste has been transferred through our HIHTLs at the Hanford site.
