Safety Performance

FY 1st Quarter Safety Performance 2002 - 2009

Record first quarter in FY09

- Operations has worked 10 million safe hours 11 times
- Construction stands at a national record of 23 million safe hours and counting
 - Last lost workday: June 1998
- SRNL is DOE's safest laboratory

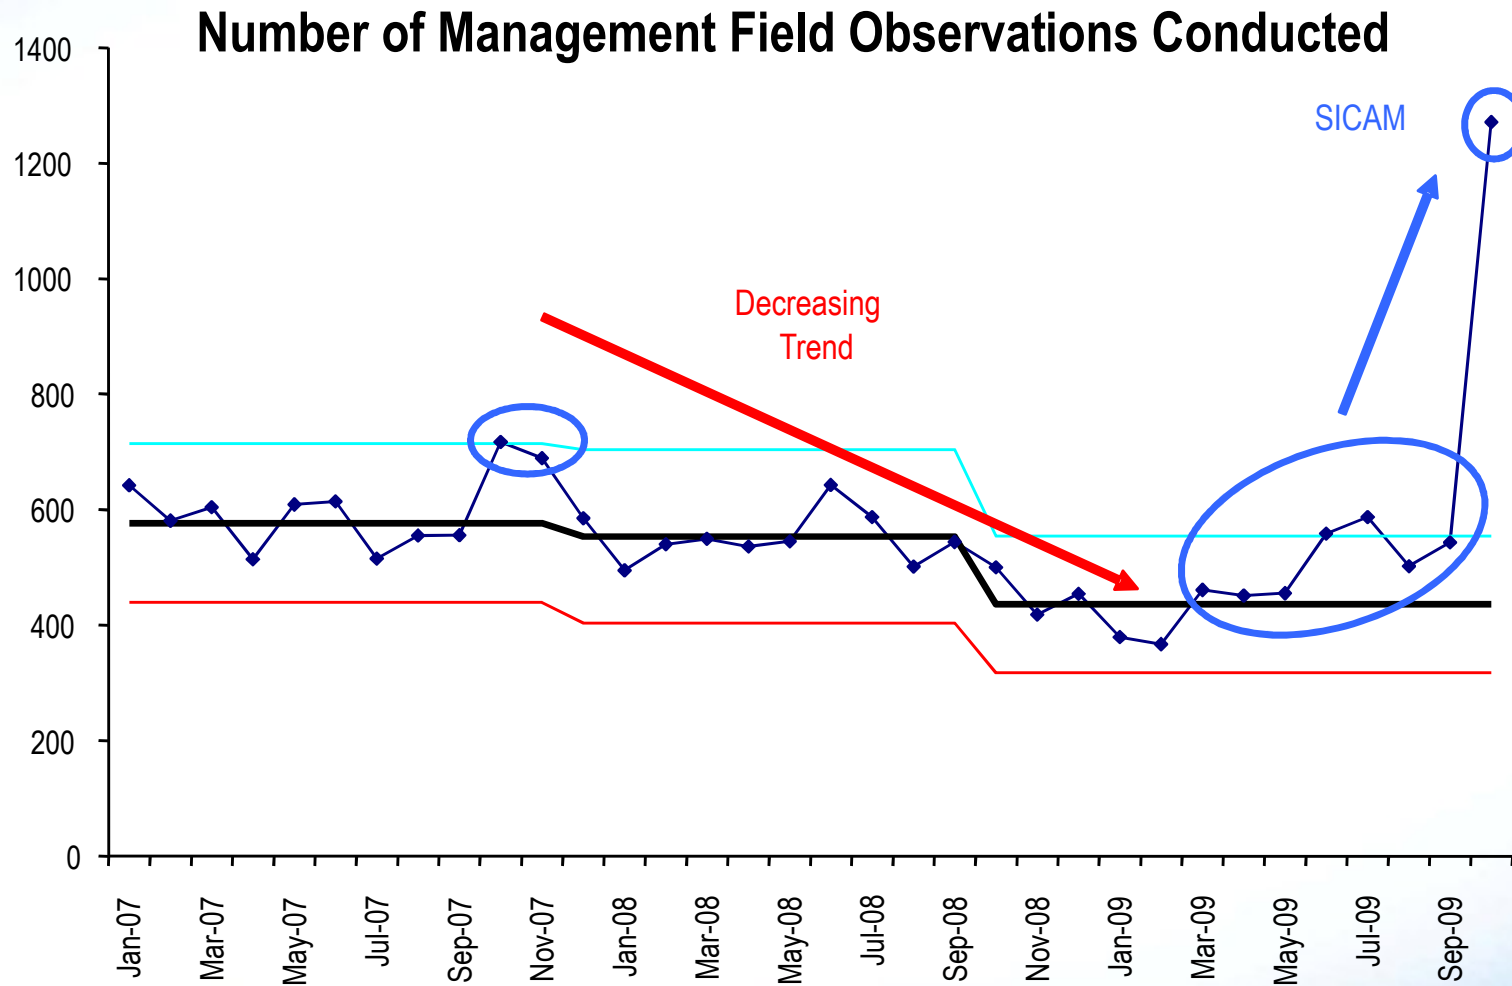

Safety Incidents

- **August 2009 - Nitric Acid Spill**
- **September 2009 - Arc Flash Injury**

Measuring Effectiveness: MFO Leading Indicators

DuPont Safety Assessment

- **DuPont Survey - 83 percent response rate**
- **Assessment team of six experienced DuPont personnel**
 - At SRS October 19-23
- **DuPont's view is that “culture change” occurs over a period of years; positive/negative**
 - Evidence suggests our culture impact began ~ 2005
- **Even though metrics were historically good, the assessment confirmed a “culture” issue**

Safety: A Business Imperative

- **First and foremost**
- **Continuously improve**
- **Five million safe hours – SRNS Operations**
- **24 million safe hours – Site Construction**
- **Zero Incidents Culture**
