The DUF₆ Project is committed to
Governance Transformation

Secretary Chu challenged all DOE elements to improve effectiveness and efficiency by re-evaluating the way we do business.

Improving the process is a fundamental tenet of Responsible Empowerment.

We are on it.

Objective of governance transformation:

Most efficient and effective mission accomplishment consistent with safe, secure and contractually compliant operation:

- Eliminate “how” or redundant requirements
- Risk management at the site level
- Increased contractor accountability
- Improved safety
- Evidence of increased productivity and cost performance
- Reducing non-value added activities/reports
- Streamlined, risk-informed federal oversight

We have an **inseparable shared fate** with our client.

To succeed, we must:

- work together with trust and respect
- change our behaviors
- communicate with integrity
- be reliable and accountable
- BOTH act without defensiveness
- recognize that BOTH will fail or BOTH will succeed

Why bother?

- Lets us focus on The Main Thing
- Reduces frustration
- Reduces bureaucracy
- Improves productivity
- Improves mental health
- Saves taxpayer (our!) dollars
- It's the right thing to do
