

**Savannah River
Remediation**

A URS COMPANY TEAMED
WITH BECHTEL | CH2M HILL | B&W | AREVA

We do the right thing.

EFCOG WMWG Round Robin

Thursday, March 06, 2014

Robert J. Petras
SRR Waste Program Lead

WM 2014 Session 104

We do the right thing.

- DWPF - Produce 125 canisters
- Saltstone - Process 1.2 million gallons of decontaminated salt solution received from Tank 50 into grout
- ARP/MCU - Process 800,000 gallons of salt solution
- Closure - Complete grouting of Tank 5 and 6 including primary tank, annulus, cooling coils and risers

We do the right thing.

- Saltstone - SDU-6 construction is underway with completion in 2017
- Closure -Moving forward on Tank 16 and Tank 12 closure (timing is dependent on funding)
- Sludge Processing - Source tanks for the next sludge batches will include from Tank 15 and Tank 26

We do the right thing.

- **Near-term limitations:**
 - **Salt Processing:**
 - **SCIX Processing:** Suspended implementation of SCIX(due to lack of funding)
 - **ARP/MCU Processing:** Reduced maximum ARP/MCU rate to 2 Mgal/yr from 4.7 Mgal/yr (due to limited SDU space in SDU-3 and SDU-5 prior to SDU-6 availability, then limited by availability of Glass Waste Storage locations)

We do the right thing.

- **Sludge Processing:**
 - **Canister Production:** Nominal canister rate prior to SWPF startup reduced to 165 from 275 (due to limited available Glass Waste Storage locations and ability to afford Sludge Bulk Waste Removal Effort)
